Nelson Irrigation Company
Water District 11
17 March 2008

Mr. Spackman,

In regards to your letter dated 20 February 2008, Nelson Irrigation is an open ditch system and already has a measuring devise when it was installed many years ago. It is a 24 inch metal Parchall flume and is located approximately one mile east of the intersection of State road 36, and State road 34, on the south side of State road 36 in Riverdale.

Mr. Holbrook is aware of this location and has made several readings at this site. The numbers on the side of the weir have been coated with hard water deposits, but it has recently been cleaned and those numbers are now very readable.

If any further action is required on our part, please let us know.
